SUBJECT INDEX

PAGE

Book reviews 733

Data analysis

The fine resolution of tidal harmonics, *M. Amin* 293
Complex exponential weighting applied to homomorphic deconvolution, *M. J. Shensa* .. 379
Calculation of Fourier transforms by the Backus–Gilbert method, *D. W. Oldenburg* .. 413
MOZAIC time-term analysis, *D. Bamford* 433

Dynamics of the Earth

Changes in the position of the geocentre due to seasonal variations in air mass and ground water, *A. Stolz* 19

Earth models

Models of the lateral heterogeneity of the Earth consistent with eigenfrequency splitting data, *F. A. Dahlen* 77

Earth tides

The fine resolution of tidal harmonics, *M. Amin* 293

Earth's core

Note of incompressibility-pressure gradients in the Earth's core, *K. E. Bullen* 717
Comments on ' Core undertones with rotation ' by D. J. Crossley, *Martin L. Smith* 725
Reply to Comments on ' Core undertones with rotation ' by Martin L. Smith, *D. J. Crossley* .. 729

Earth's lithosphere

Seismic investigation of the Papuan Ultramafic Belt, *D. M. Finlayson, K. J. Muirhead, J. P. Webb, G. Gibson, A. S. Furumoto, R. J. S. Cooke & A. J. Russell* 45
A lithosphere seismic profile in Britain—I. Preliminary results, *D. Bamford, S. Faber, B. Jacob, W. Kaminski, K. Nunn, C. Prodehl, K. Fuchs, R. King & P. Willmore* 145

PAGE

Converted *P*-waves originating at the continental margin between the Iceland–Faeroe Ridge and the Faeroe Block, *M. H. P. Bott, P. H. Nielsen & J. Sunderland* 229
Lithospheric structure of the Azores Plateau from Rayleigh-wave dispersion, *R. C. Searle* .. 537
Tidal sea load tilt of the crust, and its application to the study of crustal and upper mantle structure, *J. Zschau* 577
Crustal structure at the continental margin south of South Africa, *R. A. Scrutton* 601
The structure on the western flank of the Gregory Rift (Kenya) Part I. The crust, *P. K. H. Maguire & R. E. Long* 661

Earth's mantle

Mantle structure and short period body wave spectra at intermediate epicentral distances, *George A. McMechan* 269
Characteristics of lower mantle inhomogeneities from scattered waves, *D. J. Doornbos* .. 447
Variations in the structure of the upper mantle beneath Australia, from Rayleigh wave observations, *John H. Goncz & John R. Cleary* 507
The structure of the western flank of the Gregory Rift, Part II. The mantle, *R. E. Long & R. W. Backhouse* 677

Earthquakes

Archambeau's elastodynamical source-model solution and low-frequency spectral peaks in the far-field displacement amplitude, *J. Arthur Snoke* 27
An implosive precursor to the Colombia earthquake 1970 July 31, *B. L. N. Kennett & R. S. Simons* 471
Moment tensor representation of surface wave sources, *Douglas W. McCowan* 595

Elastic wave theory

The effect of small, aspherical perturbations on travel times and a re-examination of the corrections for ellipticity, *Adam M. Dziewonski & Freeman Gilbert* 7
Archambeau's elastodynamical source-model solution and low-frequency spectral peaks in the far-field displacement amplitude, *J. Arthur Snoke* 27
A discrete model of the inverse Love Wave problem, *Victor Barcilon* 61
The representation of seismic displacements in terms of travelling waves, *Freeman Gilbert* .. 275
Reflection, transmission and attenuation of elastic waves at a loosely-bonded interface of two two half spaces, *Gurajada S. Murty* 389
Moment tensor representation of surface wave sources, *Douglas W. McCowan* 595
Differential kernels for group velocity, *Freeman Gilbert* 649

Geochemistry

Geophysical and geochemical constraints at converging plate boundaries—Part I. Dehydration in the downgoing slab, *Roger N. Anderson, Seiya Uyeda & Akiho Miyashiro* 333

Gravity field, Earth

On the definition of gravity anomalies in three-dimensional, potential-invariant representations of the actual gravity field of the Earth, *F. Bocchio* 289

Inverse problem

A discrete model of the inverse Love wave problem, *Victor Barcilon* 61
A comparison of travel-time inversions, *B. L. N. Kennett* 517

Magnetic methods and surveys

Interpretation of project MAGNET aeromagnetic profiles across Africa, *A. G. Green* 203
A high temperature vector magnetometer, *Chr. Heiniger & F. Heller* 281
A palaeomagnetic pole from late Cretaceous marine magnetic anomalies in the Pacific, *Steven C. Cande* 547
Palaeomagnetic poles from marine magnetic anomalies, *Hans Schouten & Steven C. Cande* .. 567
Magnetic daily variations compared between the east and west coasts of Australia, *F. E. M. Lilley & R. L. Parker* 719

Magnetic properties

Direct measurement of magnetostriction in rocks using capacitance micrometry, *Paul M. Davis & Frank D. Stacey* 1

PAGE

Magnetotelluric methods and surveys

Partial derivatives for the one-dimensional magnetotelluric problem, *F. Abramovici, M. Landisman & Y. Shoham* 359
A technique for improving the accuracy of finite element solutions for magnetotelluric data, *William L. Rodi* 483

Mechanical properties

The estimation of elastic properties from analogue compounds, *G. F. Davies* 625

Normal modes of the Earth

Models of the lateral heterogeneity of the Earth consistent with eigenfrequency splitting data, *F. A. Dahlen* 77
Comments on ' Core undertones with rotation ' by D. J. Crossley, *Martin L. Smith* 725
Reply to Comments on ' Core undertones with rotation ' by M. L. Smith, *D. J. Crossley* .. 729

Oceanography

Some numerical solutions for turbulent boundary-layer flow above fixed, rough, wavy surfaces, *P. A. Taylor, P. R. Gent & J. M. Keen* 177

Palaeomagnetism

Palaeomagnetism of the Jurassic Navajo sandstone from South-Western Utah, *Allen H. Johnson* 161
A new index of palaeomagnetic stability for magnetite bearing igneous rocks, *J. W. Giddings & M. W. McElhinny* 239
A palaeomagnetic pole from Late Cretaceous marine magnetic anomalies in the Pacific, *Steven C. Cande* 547
Palaeomagnetic poles from marine magnetic anomalies, *Hans Schouten & Steven C. Cande* .. 567

Physics of rocks

Direct measurement of magnetostriction in rocks using capacitance micrometry, *Paul M. Davis & Frank D. Stacey* 1
Dilatancy and the strength of rocks containing pore water under drained conditions, *I. A. H. Ismail & S. A. F. Murrell* 107

Potential theory

On the definition of gravity anomalies in three-dimensional, potential-invariant representations of the actual gravity field of the Earth, *F. Bocchio* 289

Seismic methods and surveys

Seismic investigation of the Papuan Ultramafic Belt, *D. M. Finlayson, K. J. Muirhead, J. P. Webb, G. Gibson, A. S. Furumoto, R. J. S. Cooke & A. J. Russell* 45
A Lithosphere seismic profile in Britain—I. Preliminary results, *D. Bamford, S. Faber, B. Jacob, W. Kaminski, K. Nunn, C. Prodehl, K. Fuchs, R. King & P. Willmore* 145
Converted *P*-waves originating at the continental margin between the Iceland–Faeroe Ridge and the Faeroe Block, *M. H. P. Bott, P. H. Nielsen & J. Sunderland* 229
Site correction for long period seismometers, tiltmeters and strainmeters, *Geoffrey King, Walter Zurn, Russ Evans & Dieter Emter* 405
Tidal sea load tilt of the crust, and its application to the study of crustal upper mantle structure, *J. Zschau* 577
A fast method for computing load induced stress in the Earth, *E. Nyland & R. J. Withers* .. 689
Observed and computed seismogram sections for the whole Earth, *G. Müller & R. Kind* .. 699

Seismology

The effect of small, aspherical perturbations on travel times and a re-examination of the corrections for ellipticity, *Adam M. Dziewonski & Freeman Gilbert* 7
Inversion for V_p/V_s in shallow source regions, *Thomas J. Fitch & M. W. Rynn* 253
Mantle Structure and short period body wave spectra at intermediate epicentral distances, *George A. McMechan* 269
The representation of seismic displacements in terms of travelling waves, *Freeman Gilbert* .. 275

PAGE

Structural dependence of the apparent initial phase of Rayleigh waves, *José Frez & Fred Schwab* 311
MOZAIC time-term analysis, *D. Bamford* 433
Characteristics of lower mantle inhomogeneities from scattered waves, *D. J. Doornbos* .. 447
An implosive precursor to the Colombia earthquake 1970 July 31, *B. L. N. Kennett & R. S. Simons* 471
Variations in the structure of the upper mantle beneath Australia, from Rayleigh wave observations, *John H. Goncz & John R. Cleary* 507
A comparison of travel-time inversions, *B. L. N. Kennett* 517
Lithospheric structure of the Azores Plateau from Rayleigh-wave dispersion, *R. C. Searle* .. 537

Tectonics

Evidence for incipient rifting in Southern Africa, *C. H. Scholz, T. A. Koczynski & D. G. Hutchins* 135
Geophysical and geochemical constraints at converging plate boundaries—Part I. Dehydration in the downgoing slab, *Roger N. Anderson, Seiya Uyeda & Akiho Miyashiro* .. 333
